

## COMPOSED FRONT PANELS - LARGE AND SMALL BATCHES

A composed front panel consists of a carrier plate on which a thinner front plate/film is glued. Polychromal creates composed front panel available as aluminium on aluminium, stainless steel on aluminium, aluminium on stainless steel, and synthetic materials on aluminium. Naturally, these panels can be equipped with a range of recesses for switches, connectors and/or displays. Studs can be pressed into the carrying plate from above, on which the thinner front plate/film is attached. The studs will be locked in place, the rear will be clean, and nothing will be visible from the front. The composed front panels can be anodised all around, provided with (partially) chromated surfaces, and coloured. Of course, these composed front panels can also be powder coated or (wet) spray painted.

Do you want to learn more about our solutions for composed front panels, available in both large and small batches?

Visit our website at [www.polychromal.com/intf](http://www.polychromal.com/intf) for more information.

## NEW DSE-50R ALUMINIUM PRINTER - 400 X 600 MM

As announced earlier, Polychromal is working on the successor of the DSE-50-Aluprinter, which will be called DSE-50R. This printer is expected to be ready for production in November - December of this year. The expected retail price including computer, RIP, and heated vacuum bed will be € 25,000. Do you want to be informed of the availability? Send an e-mail to [info@polychromal.nl](mailto:info@polychromal.nl).

## PROMO CAMPAIGN INTF - SUMMER 2019

INTF has a special promotional campaign in the months of July to September as part of which we create aluminium keychains and rulers in your brand style at sharp rates. What is more beautiful than a colourful and durable give-away made of stylish aluminium?

### Onze aanbieding:

Aluminium keychain printed on both sides with ring and full-colour text/image, dimensions: oval 50 x 30 x 0.8 mm, € 3.95 per piece at a batch of 100.

Aluminium ruler printed on one side in full colour with the following dimensions: 260 x 45 x 0.8 mm and round corners, € 7.75 per piece at a batch of 50.

The prices do not include any preparation/design costs.

## NAME BADGES AND UNIQUE BUSINESS CARDS

Do you want to make a unique impression on your partners? Polychromal INTF creates personalised business cards and name badges made of durable and scratch-resistant anodised aluminium.

### Some of our options:

Aluminium business card 85 x 55 with full-colour text/image and rounded corners, € 4.95 per piece at a batch of 50 - € 7.95 per piece when printed on both sides.

Anodised aluminium name badges with magnet clip and full-colour text/image, dimensions: 70 x 30 x 0.8 mm, round corners, € 15.00 per piece at a batch of 10.

The prices do not include any preparation/design costs and are valid until September 2019. Name badges can also be provided with a safety pin rather than a magnet clip.

## PRICE ADJUSTMENT POLYCHROMAL PRODUCTS

The prices of the Polychromal Products will be adjusted as of 1 September 2019. We have already informed you about this. If you wish to receive our new price list again, please send an e-mail to [products@polychromal.nl](mailto:products@polychromal.nl).

## FACEBOOK AND LINKEDIN

We regularly publish product news and new developments about Polychromal Products and INTF on our social media channels. Do you want to stay aware of the latest news? Follow us on [Facebook Products](#), [Facebook INTF](#) or our general [LinkedIn](#) channel. Of course, we would appreciate it if you like or comment on our messages. See you on social media!

## POLYCHROMAL ISO 14001-CERTIFIED NEXT YEAR

We will be audited for the ISO 14001 certification in March 2020, certifying our environmental management system. Of course, we were already in the possession of an ISO 9001 certificate, but ISO 14001 is a real added value to Polychromal and will affirm its policy in the field of environmentally-conscious actions and the efficient use of raw materials and energy.

## SOLAR PANELS

Polychromal has chosen to take a step towards a better future for all of us by purchasing a Compact Solar power system. The system consists of 476 panels and has been installed on the roof in the most efficient setup. Each solar panel has a peak capacity of 300 Wp, which results in an overall system size of 142,800 Wp.

The picture shows Stephan and Eric Hensen, together with Rolf Huibers of Compact Solar.

## NEXT HOLIDAY/SUMMER PERIOD

### For your schedule:

The occupancy at Polychromal will be limited in week 30 to 34. This will also be the period during which we carry out major maintenance. As a result, the delivery periods may be longer than you are used to. The entire Polychromal team wants to wish you a great summer!
